11. GLOSSARY	36

Overpopulation of the planet and our consumption habits are annually eroding more natural resources than the Earth is able to produce and regenerate, and this phenomenon is occurring at an ever faster rate.

Human impact has significantly altered 75% of the earth's environment and about 66% of the marine environment, putting around 1 million animal and plant species at risk of extinction. **The constantly increasing levels of carbon dioxide in the atmosphere caused by human activities is at the root of the climate crisis that has afflicted our planet and is threatening the biodiversity and equilibrium of many natural ecosystems.** This crisis is increasingly taking the form of environmental disasters that also have **negative consequences for our health.**

Reducing and offsetting our impact in order to protect nature is essential, but not sufficient. **To safeguard the future of our planet, and with it that of our species, we must urgently** take a regenerative approach to natural resources.

With the launch of **Sacred Nature**, a line with a **strong focus on sustainability**, [comfort zone] has decided to play a leading role in bringing about radical change with **skincare that is not only effective and safe when it comes to regenerating the skin, but that also actively contributes to regenerating the planet, helping to mitigate the climate crisis.** Sacred Nature is a **bio-regenerative line, certified according to COSMOS ORGANIC & NATURAL standards, eco-designed according to criteria that ensure** a positive impact on the environment.

Research into formulations began in the Scientific Garden at our Village in Parma, an open-air extension of the [comfort zone] laboratories, which for the first time have adopted **direct control of the supply chain for the supply of active molecules.** This has made it possible to guarantee the highest standards of performance and transparency, while involving small local businesses in active ingredient cultivation. These businesses work the land in a way that respects plants' natural cycle, paying careful attention to biodiversity issues and regenerative agriculture practices.

This innovative and super-sustainable research has led to the creation of **Scientific Garden Extract™**, a complex of **three bio-fermented extracts of myrtle, elderberry and pomegranate**, packed with antioxidant phytoactive ingredients, which – **combined with additional specific biotechnological active ingredients for each individual formulation** in the line – defend the skin against environmental aggressors and stimulate cell renewal, ensuring optimal skin balance and resilience, as well as prolonged youth.

Sacred Nature offers an **effective face and body routine that is simple, complete and very satisfying** thanks to **soft and tactile textures** and a natural scent inspired by a walk in the Scientific Garden. Suitable for all skin conditions, it is also clinically tested for the most sensitive skin.

The **seven homecare products** include a cleansing balm, an exfoliating mask, a youth serum, a moisturizing cream, a nutrient cream, a cleansing soap and a rich body butter. The **antioxidant and regenerating professional youth-enhancing face treatment is offered in two versions that can be personalized** according to skin conditions and the time available (30 or 50 mins). It is ideal for revitalizing the skin and ensuring that it looks young, healthy and radiant.

The packaging has also been designed with a **sustainable** focus, using only clear glass, metals and recycled paper, materials which can be effectively recycled all over the world and which do not degrade in the environment, damaging the food chain.

The line is CO2 negative thanks to choices made in **design and production**, as well as to the **proprietary Ethio Trees CO2 compensation project.** Finally, through our participation in the **1% for the Planet** initiative, we donate 1% of proceeds from the sale of Sacred Nature to finance environmental and social sustainability projects.

SACRED NATURE.
REGENERATE YOUR SKIN,
REGENERATE OUR PLANET.

02. INNOVATION

After 20 years of experience in formulating cosmetics, the [**comfort zone**] laboratories have set up an **open-air research site** that has led to the creation of the active ingredients in the new Sacred Nature line and which illustrates the brand's commitment to **promoting a completely traceable and virtuous supply chain for the environment and for local farming communities**.

SCIENTIFIC GARDEN EXTRACT™

Observation of the plants in the **Scientific Garden in Davines Village in Parma (Italy), the brand's headquarters**, has not only filled us with a sense of wonder and well-being, **but has also inspired our researchers to find innovative and extremely effective scientific solutions**. Plants have an extraordinary ability to adapt and develop a resilience towards the surrounding environment. They do so through the synthesis of metabolites that can be studied and taken as an example for the creation of active ingredients.

This research has led to the creation of **Scientific Garden Extract™, a complex of three bio-fermented extracts obtained from myrtle leaves, elderberries and pomegranate peel, selected for their high content of antioxidant phytoactive ingredients** that can protect the skin against the constant and daily attack of free radicals caused by the environment, lifestyle and biological aging.

Directly **studied** in the Scientific Garden, **these plants have then been cultivated through collaborations with small Italian farms** selected for their "good" regenerative agriculture cultivation practices, designed to safeguard biodiversity and decarbonize the atmosphere.

FOCUS ON THE SCIENTIFIC GARDEN AND THE CIRCLE OF SCIENCE

At Davines Village, the Davines Group's new sustainable headquarters in Parma, Italy, opened in 2018, **the Scientific Garden serves as an open-air extension of the research laboratories**, representing the ultimate expression of the B Corp-certified company's philosophy focused on promoting **sustainability, environmental regeneration** and a **humanistic approach to science**. The Scientific Garden is home to over **6,000 varieties of plants** and was created to offer the in-house research team new insights and to enable them to directly source natural raw materials. **The special and distinctive circle structure symbolizes perfection, completeness and unity, recalling the principle of circularity.**

The model used for creating natural raw materials starting from the Scientific Garden consists of four consecutive phases:

PHASE 1. Selection of plants according to effectiveness and biodiversity criteria, conducted with the Universities of Florence and Parma, is validated by "**characterization**" studies that include **qualitative and quantitative studies** to evaluate the composition of active and functional molecules for cosmetics.

PHASE 2. Extraction of active ingredients, carried out using sustainable extraction methods without chemical solvents.

PHASE 3. Efficacy tests on the extracts obtained to validate the theories that emerged from the characterization phase.

PHASE 4. Cultivation, through the **selection of regenerative farms** that can grow the selected plants.

02. A ACTIVE INGREDIENTS: PROPERTIES AND HARVESTING

Sacred Nature's sustainable formulation approach, aimed at promoting biodiversity and the principle of circularity, has led our research and development laboratory to opt for **organic or wild plantations** and to **select plant components that are considered "waste"** by other supply chains, optimizing the use of natural raw materials.

FOCUS ON BIODIVERSITY

Biodiversity is the wide variety of animals, plants, fungi and microorganisms that make up our planet.

A **multiplicity of species and organisms** which, connected to each other, **create a fundamental balance for life on Earth**.

Unfortunately, **the increasing levels of CO₂ in the atmosphere**, together with **intensive land exploitation, deforestation** practices and rising temperatures, are putting Nature's wealth of expressions and interconnections at risk. **This gradual decline in biodiversity** does not simply lead to the disappearance of a few rare or ancient species or varieties, but **endangers entire ecosystems**. For example, the loss of just one species means the disappearance of one of the nutrition sources of an entire food chain. Loss of biodiversity **reduces Nature's ability to adapt to change**.

Restoring the time and the conditions that Nature requires to renew itself and regenerate, supporting the development of minor plant species, rediscovering the art of agriculture and connections with those who work the land: these are all important practices that have become essential to promote biodiversity and to rebalance entire ecosystems, making them more resilient.

MYRTLE MYRTUS COMMUNIS

One of the main **Mediterranean evergreen shrubs** with beneficial properties that have been known since the time of the ancient Romans, who used a decoction or infusion of myrtle leaves to soothe coughs. The fresh leaves were also used in local applications on sores and wounds to promote healing. Today, science has shown that myrtle leaves have proven **anti-inflammatory and anti-aging properties**.

Myrtle leaves have a very varied **polyphenolic composition**. The following are of particular interest:

- **Myricetin derivatives**, among the most **powerful natural antioxidants**, which protect cells from damage caused by free radicals and thus reduce the effects of cellular aging.
- **Tannins** have a **vasoconstrictive effect** and, when exposed to sensitive skin, **they protect the delicate capillary network**.

Cultivation and harvesting of leaves – Our formulators, assisted by our agronomist and the Universities of Florence and Parma, **selected one of the few farmers in Sardinia**, in the province of Cagliari, **who grows myrtle with an organic approach**, and chose **the best time for harvesting them, namely the month of July**. Immediately after flowering, the team traveled to Sardinia and directly participated in the harvesting of the leaves. This procedure was **done by hand in the early hours of the morning and at sunset** to prevent the burning heat of the summer sun from withering the leaves too quickly. **As soon as they were harvested, they continued along the cold chain until the extraction of the active ingredient**. The green leaves, which are soft to the touch and intensely fragrant, were **picked from the lower parts of the plant to avoid affecting the ripening process of the berries**, which were harvested at a later date and used to make liqueurs. A part of the plant that would otherwise have remained unused was therefore exploited.

POMEGRANATE PUNICA GRANATUM

Punica Granatum, commonly known as pomegranate, **is a fruit** native to Afghanistan, Iran, China and the Indian subcontinent. Its cultivation and consumption have been widespread in the Mediterranean region for centuries. **Punicalagin, a polyphenol known for its powerful antioxidant effect, is extracted from its peel.** Known and used in the medical field to treat various disorders ranging from cardiovascular problems to diabetes and inflammation, punicalagin is very beneficial in cosmetics for **helping to protect against damage caused by UV rays.**

Cultivation and harvesting of the peel –Pomegranates are **harvested in autumn**, when the deep red fruits gleam among the season's characteristic yellow leaves. **The fruits are harvested by hand** so that the ripest ones can be chosen. The owner is a farmer in Faenza, Emilia Romagna, who cultivates the pomegranate variety selected by [comfort zone] on her family's land and who, with the help of her family, hand-squeezes the fruit one by one using a small press to extract a precious concentrated juice considered one of the most powerful antioxidant nutraceuticals. **The cosmetic extract is collected from the fruit's peel, transforming waste that is unusable in the food chain into a precious health and beauty resource for the skin.**

ELDERBERRY SAMBUCUS NIGRA

Sambucus nigra is a **deciduous shrub** that is widespread in many of the world's continents, including Europe. **Its fruits consist of clusters of tiny, dark-colored berries.** Used in medicine due to its diuretic, anti-rheumatic and anti-neuralgic properties, as well as in the food industry as a health drink, it also has very interesting effects on the skin.

In the province of Parma, where our company is based, **the bush grows wild in the area's woods and hills.** It is a species that is found in abundance in places with minimal human presence and interference: **the wilder it grows, the more it flourishes.**

The two main classes of polyphenols found in the extracts are flavonoid glycosides and hydroxycinnamic acid derivatives. **Flavonoids are important components** for cosmetic treatment thanks to their renowned **antioxidant effects.** Hydroxycinnamic acid derivatives have been shown to have **anti-inflammatory and antibacterial properties.**

Harvesting of the berries – There are no specialized elderberry farms in Italy. Harvesting of the wild plants was entrusted to several farms in the Emilian area and was **carried out between August and September.** Since the fruit does not all ripen at the same time, it had to be harvested several times.

Harvesting wild berries is not easy, but it is invaluable. It means that there was no human interference during growth and that the plants and soil are therefore not polluted by chemicals and pesticides. Rather, the plants are allowed to grow in their natural manner and according to their natural timescale, resulting in particularly strong and potent ingredients.

02. B

EXTRACTION METHOD: BIO-FERMENTATION

Among the various extraction methods, a **dual technology was chosen that combines enzyme-assisted extraction with fermentation**, in full compliance with environmental sustainability criteria. Enzyme-assisted extraction only requires the **use of water as a solvent, offering several advantages from an environmental perspective**, and is, moreover, an **essential process to activate fermentation.** Free sugars are required for a substance to ferment. For certain parts of the plant this can only happen after enzyme-assisted transformation. One example is **myrtle leaves, which can only ferment after they have been treated with enzymes, since this alone enables them to release the sugars from the plant fiber** that traps them. The enzyme-assisted extraction process, therefore, allows all those plants (or parts of them) to ferment, which would not have been otherwise possible.

Fermentation is a process that has been known and used by man for thousands of years **to make food and drinks.** We have **chosen to use it in the cosmetic field in order to increase the concentration of antioxidant molecules.** The sugars are processed by the microorganism (yeast) which, as though it were a bio-reactor, produces additional substances that would not otherwise be obtained.

The **"two-stage" extraction method involving enzyme-assisted extraction and subsequent fermentation** thus makes it possible to obtain an exclusive functional pool that has a **+22% antioxidant activity than simple enzyme-assisted extractions.**

02. C

CULTIVATION: REGENERATIVE AGRICULTURE

The cosmetics industry can play an important and active role in the fight against climate change. Companies that control the farms from which they obtain their raw materials, either directly or through partnerships, and **opt for virtuous cultivation methods**, can **positively influence the process of decarbonizing the atmosphere, and can contribute to making the ecosystem more resilient** in facing growing climate challenges. Supporting regenerative agriculture therefore makes it possible, by restoring the land's fertility, to grow healthy and balanced plants which, in turn, bring health benefits to animals and people.

FOCUS ON REGENERATIVE AGRICULTURE AND CARBON SEQUESTRATION

30% of the CO₂ annually produced by human activities is absorbed by plants through photosynthesis and is stored in the soil even after the end of the plant's vegetative cycle. **This percentage of soil organic carbon (SOC) can be increased through regenerative agriculture**, while improving soil fertility and productivity and making the soil and ecosystem in general more resilient. This choice offers the opportunity to sequester more CO₂ and therefore to proactively address the effects of climate change. **Organic carbon is an essential component** for the primary functions of the soil and its ecosystem: **it increases the soil's capacity to retain and drain water and to deliver nutrients to plants.**

Land exploited through **intensive and monoculture farming** poses a serious problem, not only because it **severely depletes soil and reduces biodiversity**, but also because, on a large scale, it impacts the greenhouse gas balance.

Organic and regenerative agriculture, by contrast, follows the ways and rhythms of nature and enables it to express itself in all its richness. This theoretical and practical discipline **combines traditional practices with modern scientific knowledge** and is based on these principles, which **increase the percentage of organic carbon in the soil.** These practices include:

- use of **natural fertilizers** such as manure and compost instead of chemical fertilizers
- a drastic **reduction in synthetic pesticides**
- respect for the **natural cycle of crops** without artificial constraints

Furthermore, supporting these types of agricultural practices is a concrete way of **promoting the social development of small local communities, because it promotes work relationships based on protecting the rights and dignity of people and animals**, while encouraging the transfer of ancient knowledge, a collective resource that should be protected and passed on.

03. FACE PRODUCTS AND TREATMENTS

PRODUCTS AND TREATMENT

The new Sacred Nature bio-regenerative line has been designed to **regenerate the skin, making it more resilient to climate and environmental changes.**

The exclusive Scientific Garden Extract™ regenerates the skin's defense mechanisms against oxidative processes and offers extra protection to the skin barrier, keeping it as efficient as possible and prolonging its youthful and healthy appearance.

Designed for all skin types and tested on even the most sensitive skin types, Sacred Nature restores the optimal level of hydration, nourishment and antioxidant protection of the face and body on a daily basis. Based on the principles of sustainability and performance, **the various formulas' effectiveness is clinically tested** and further supported by international certifications such as Cosmos Organic & Natural and EWG™ Environmental Working Group.

FOCUS ON SKIN REGENERATION AND RESILIENCE FOR PROLONGED AND RENEWED YOUTHFULNESS

The skin, the organ that provides our first line of defense against the outside world, is **increasingly subject to climatic stress and is affected by sudden changes in the environment:** changes in average temperature and unexpected hot and cold peaks, changes in humidity and the high accumulation of greenhouse gases in the atmosphere. **Constantly targeted by free radicals** that threaten its balance, **it relies on its natural antioxidant defense systems, which, however, due to these constant external and internal attacks, are unable to provide constant and effective protection.** This affects the skin's youth and health and is manifested in the form of dryness, discomfort and signs of aging.

Climate change exacerbates dehydration, compromises the skin barrier and in other cases considerably increases perspiration, resulting in a higher susceptibility to developing blackheads. Fine pollution particles also slow cell turnover and make the skin more fragile, producing a duller and more uneven complexion. Skin texture can become thicker due to strong sun exposure or thinner and more fragile as a result of cold temperatures.

By observing plants' behavior and admiring their ability to adapt, we have created a skincare solution that can regenerate the skin's balance. The skin's antioxidant protection is enhanced through phytoextracts from Scientific Garden Extract™ plants. Moreover, each product is characterized by specific botanical active ingredients that stimulate cell turnover, smoothing and softening the skin which regains a more youthful appearance, and provides greater defense against environmental aggressors. Biotechnological extracts of moss, Japanese Cedar buds and Kangaroo Paw Flower promote regeneration of the skin barrier and elasticity and activate the cell renewal process, restoring the barrier's integrity and ability to defend itself against environmental aggressors.

JAPANESE CEDAR BUDS EXTRACT Preserves the energy of keratinocytes and all processes essential for **effective epidermal reconstruction:** proliferation, differentiation, keratinization and desquamation. This cellular efficiency preserves the **biosynthesis of key ceramides** and the **cohesion of the corneocytes** with consequent protection of the skin's **efficient structural barrier function,** making the skin more compact, toned and elastic.

BIOTECHNOLOGICAL MOSS EXTRACT In our skincare solutions, we have incorporated moss' high adaptability to various and extreme environmental conditions. *Physcomitrella Patens* has been grown on a large scale with an ethical and sustainable method that uses the energy produced by light and carbon dioxide. Through this innovative process of cultivation and

subsequent cold extraction, it was possible to transfer the truly extraordinary adaptation and survival strategies of moss to the cosmetic product without impacting biodiversity: this challenge was by no means straight-forward given that harvesting mosses from nature is neither permitted nor sustainable, since they grow slowly and are crucial elements of their particular ecosystem.

Moss extract promotes cellular exchange between the nucleus and extracellular matrix and helps skin to adapt to environmental changes, making it more resilient and less susceptible to aging processes caused by a variety of stressful situations.

KANGAROO PAW FLOWER EXTRACT A flower from the Australian wild heaths, containing rutin and fructose, it promotes and restores cellular vitality. It increases the synthesis of Tenascin-X, a protein that functionally organizes the arrangement of collagen and elastin and combats wrinkles and sagging skin. This extract's firming action combines with the effectiveness of the active ingredients that target the skin barrier and promotes a significant anti-aging action.

SENSORY EXPERIENCE

In addition to great effectiveness, Sacred Nature offers a particularly natural and satisfying sensory experience thanks to biomimetic textures and to a natural scent inspired by a walk in the Scientific Garden.

PRODUCT RANGE

The line is suitable for all skin conditions and is clinically tested for the most sensitive skin. The seven homecare products consist of a cleansing balm with a transforming texture, a progressive exfoliating mask, a youth serum with a light texture, a moisturizing cream and a nutrient cream to choose from based on your skin condition, a rich body butter and a cleansing soap that does not dehydrate the skin.

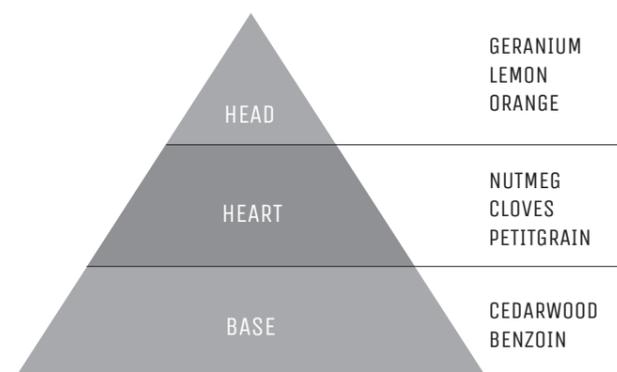

The **antioxidant and regenerating professional youth-enhancing face treatment is offered in two versions that can be personalized** according to skin conditions and the time available (30 or 50 mins). Products formulated according to the COSMOS ECOCERT guidelines make it possible to offer **solutions that can be customized according to age, climate and skin condition in order to reoxygenate, moisturize, nourish and restore vitality and a more youthful appearance.**

03. A NATURAL FRAGRANCE

In keeping with the line's sustainable, organic approach, which is safe for both the skin and the environment, the fragrance was created by following the same principles. Designed to transport you to a simple and reassuring universe and to leave a recognizable olfactory memory, it was skillfully developed by Joëlle Lerioux Patris, a well-known French perfume maker who, following a visit to Davines Village, interpreted the sensations and emotions that she experienced during a walk in the Scientific Garden.

Through a selection of **essential oils**, it features notes that evoke simplicity, variety and sustainability, in which the plants tell a story and all the plant's parts contribute to an invigorating aromatherapy action. The result is an eco-friendly 100% natural, modern, distinctive, yet discreet fragrance.

It opens with a **lively note of geranium**, a flower very reminiscent of roses, which however exudes a fruity, fresh and soothing note. Juicy **lemon and orange** notes enrich and sweeten the head of the fragrance. The heart is characterized by **bold spicy notes of nutmeg and cloves**. **Leaves and sprigs of Italian petitgrain round off the heart** and accompany the perfume to its close, which is marked by the dry note of **Cedarwood** and the reassuring note of **Sumatran Benzoin**.

03. C COSMOS EWG

The **EWG Verified™** mark is awarded by the American non-profit organization **Environmental Working Group** to cosmetics that meet strict transparency and safety criteria.

Since 1993, a team of **scientists, toxicologists, chemists and epidemiologists** has been dedicated to collecting information on ingredients used in cosmetics, developing a product evaluation process that guarantees consumers the highest level of safety.

The active ingredients undergo a **two-stage evaluation**. The first is conducted with the skin deep system followed by verification and approval by the EWG committee.

EWG has a list of "Unacceptable Ingredients" including those **substances associated with potential risks to human health and the environment**. A second list details the "Ingredients with Restrictions". In this second case, the formula can only include these substances if added within the limits set by authorities such as EU Regulations, Japanese legislation and the standards established by Health Canada for cosmetic products.

Among the criteria necessary for certification, EWG requires **information that is as transparent as possible on the label**, which must comply with the standards set by the European Union and show all the ingredients used, including those contained in the formulation of the fragrance. The simple wording "Parfum/Fragrance" is therefore not accepted: it is necessary to specify all the components that make up the fragrance.

Approval of the formula is preceded by a thorough and **complex analysis that results in a product score on a scale of 1 to 10**.

A low score between 1 and 2 is an eco-friendly score and a positive assessment of the product, which allows it to obtain the certification.

To complete the certification process the company must demonstrate that it complies with the strict criteria set out by EWG. The EWG VERIFIED™ mark remains valid for up to three years. After this period, updated product information must be submitted and the verification process must be completed again.

03. B COSMOS CERTIFICATION

An acronym for Cosmetics Organic Standard, Cosmos was established to bring together five important European organizations under the same umbrella and to promote more uniform regulation of the organic sector: Ecocert and Cosmebio for France, BDIH for Germany, the Soil Association for the UK and ICEA for Italy. Cosmos' stated aim is to promote truly sustainable cosmetics throughout the whole supply chain, from raw materials to production and packaging. Obtaining the Cosmos certification offers reassurance to the most discerning consumers who require clear and transparent information about the product, its composition and its percentages of organic ingredients.

Indeed, the Cosmos specification sets **strict formulation criteria that favor eco-friendly and sustainable cosmetics**: for example, it stipulates a categorical ban on the use of petrochemical solvents in the production of organic ingredients and **specifies that renewable resources must be used**. Prohibited substances are detailed such as nanomaterials, ingredients derived from genetically modified organisms (GMO) and irradiated ingredients. **The use of raw materials from animals or plants that appear on the European and International Lists of protected species is also prohibited**. There are two different certifications: "Cosmos Organic" for organic cosmetics and "Cosmos Natural" for natural cosmetics.

For Cosmos Organic, the finished product **must contain a percentage of organic ingredients** of at least:

- Leave-on products -> 20%
- Rinse-off products -> 10%

Ingredients of agricultural origin that are physically processed must maintain an organic composition of 95%.

Sacred Nature Glow Clay Mask is covered by the Cosmos Natural certification.

To obtain Cosmos certification for Sacred Nature, all the product formulas and production process were evaluated, an on-site inspection was carried out at the [comfort zone] headquarters in Davines Village and all communications regarding the line and packaging were verified. After the certificate of conformity has been issued, the certification is reviewed following an annual visit.

04. ECO-DESIGN AND PACKAGING

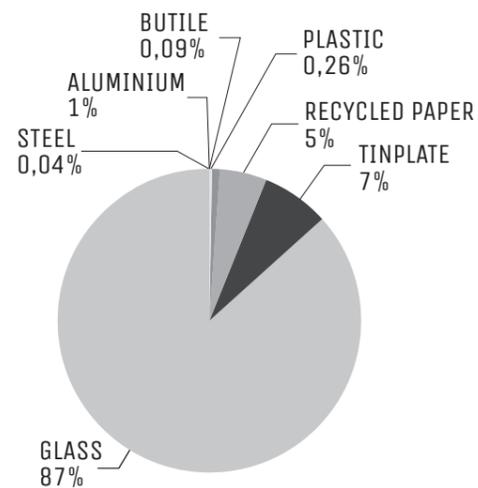

The new Sacred Nature packaging also expresses the line's sustainability and transparency values. In line with circular economy principles, **it has been "eco-designed" with great attention to the product's end life, favoring raw materials that are widely recycled such as glass, metals and paper.**

87% of the weight of the packaging materials is accounted for by **transparent glass**, chosen as the main material for both homecare and professional products. It is an **impermeable and functional material for storing formulas**: gas, water vapor and contaminants cannot penetrate glass packaging and the cosmetic qualities of the product it contains are therefore guaranteed over time. **The transparent pack avoids the use of paint and simplifies recycling.**

Glass can be recycled an infinite number of times, while preserving its properties. Furthermore, even when glass is not recycled, it does **not degrade into micro-components in the environment and therefore it does not disrupt aquatic ecosystems.**

The boxes and labels are made of 100% recycled certified FSC paper (from properly managed forests). The reduced weight of the boxes and the elimination of leaflets have made it possible to reduce the use of paper.

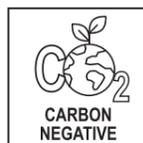

The jar caps and dispensers are made of metal, aluminum and steel, which have the highest recycling rate in the world (79.5% in Europe) and **can be recycled countless times.** All the packaging components are compatible with each other and can be managed in recycling channels. Plastic accounts for just 0.26% and is only used in the pump dispensers due to technological reasons.

Through the LCA (Life Cycle Assessment) analysis carried out by the [comfort zone] Packaging Research team, a quantitative and precise measurement of how the line's entire life cycle impacts the environment has been calculated according to 17 different criteria. **Particular reference was made to Global Warming Potential, the analysis that made it possible to calculate the amount of CO₂ emitted during the production cycle** (raw materials, packaging, processing, inbound and outbound transport, end of life), which benefits from cultivation through regenerative agriculture.

This study made it possible to calculate the total kg of carbon dioxide equivalents emitted, which were offset by Davines Group's proprietary **Ethio Trees** reforestation and social development project. Moreover, thanks to the **1% for the Planet** initiative, an international non-profit organization, 1% of the proceeds from the line across all channels will be donated to the same reforestation fund so that the line has a negative carbon footprint, effectively contributing to the fight against the climate crisis.

04. A OUR FIRST CARBON-NEGATIVE LINE

05. BEAUTY ROUTINE

FACE

BODY

SACRED NATURE CLEANSING BALM

PRODUCT

Oily cleansing balm for face and eyes.
With almond and buriti oil it removes makeup and impurities leaving the skin soft and smooth.

ORGANIC CERTIFIED COSMETIC

100% natural origin
26.1% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

Formulated to offer very gentle cleansing for the face and eyes with just one step. The dense texture composed of organic buriti and almond oil, which contains a high level of antioxidants that give the product its orange color, enables it to be massaged with techniques that reactivate microcirculation, oxygenate the skin and, by capturing impurities, purify it.

In contact with water, the balm texture turns into a milky solution that can be easily rinsed with water or removed using a cotton flannel.

ADVANTAGES

Double cleansing: face and eyes
Just a little product is enough to completely cleanse the face and the eyes
Skin feel with moisturizing effect
Transforming texture from balm to milk
Fragrance-free
Ophthalmologically tested

ACTIVE INGREDIENTS

ORGANIC BURITI OIL A precious active ingredient derived from a palm tree native to Brazil, which is also known as the "Tree of life". Its characteristic bright orange color reflects its remarkably high antioxidant carotenoid content.

RECOMMENDATIONS

For skin of all ages, especially normal or dehydrated skin.

HOW TO USE

Using a spatula, take a small amount of cleansing remover balm and massage on the face and neck. Rinse with water or use the [comfort zone] cleansing towel.

EFFICACY TEST

100% of the panel believes that the product effectively removes makeup from the face and eyes*
100% of the panel believes that the product is well-tolerated by the eyes*

*Self-evaluation, 20 people using the cleansing balm for 28 days.
Test conducted by independent laboratories.

PACKAGING
glass jar

SIZE

06. HOMECARE PRODUCTS

COMPLEMENTARY PRODUCTS

YOUTH
SERUM

HYDRA
CREAM

NUTRIENT
CREAM

SACRED NATURE EXFOLIANT MASK

PRODUCT

Illuminating mask with 9% gluconolactone, for a delicate exfoliating and renewing action on the skin.

ORGANIC CERTIFIED COSMETIC

99.8% natural origin of total
17.4% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

Gel mask with 9% gluconolactone and natural gels, ideal to convey the renewing and illuminating action of the polyhydroxy acid. Its texture makes it easy to massage the gel on the face and it tends to absorb relatively quickly depending on the characteristics of the skin.

ADVANTAGES

Immediate and progressive exfoliating action
Smooths, brightens and counteracts impurities
Suitable for all skin types, including the thinnest skin
Fragrance-free

ACTIVE INGREDIENTS

SCIENTIFIC GARDEN EXTRACT™ A complex of bio-fermented organic extracts of myrtle, elderberry and pomegranate, directly selected and created by [comfort zone] to ensure traceability, sustainability and maximum effectiveness. The selected berries, leaves and peels have a high content of antioxidant and protective phytoactive ingredients, which preserve the skin's beauty and youth from the daily attack of free radicals.

GLUCONOLACTONE 9% polyhydroxy acid with a non-aggressive exfoliating action. It acts on the surface layer of the skin, stimulating the structure of the corneocytes and promoting progressive cell turnover. It is a recommended acid for both resistant and thinner skin, as well as for skin that tends to produce excess sebum, since it minimizes the formation of blackheads.

RECOMMENDATIONS

For resistant and thin skin, to promote renewal that enhances smoothness and radiance.
For impure skin, to reduce keratinization and therefore blackhead formation.

HOW TO USE

In the evening, apply a thick layer to the face and neck. Leave it on for 15 to 20 minutes. Rinse with water. Use up to three times a week.

We recommend a cycle of at least one month.

Throughout the period in which the product is used, as well as in the following month, it is recommended to use a high protective SPF product during the day.

CAUTIONS: avoid contact with the eyes. This peel can produce redness and heat when applied.

EFFICACY TEST

The skin was smoother immediately after using the product for 95% of the panel.*
The skin's brightness improved for 80% of the panel immediately after using the product and after 28 days of treatment**.

*Self-evaluation, 20 people using the exfoliant mask over a period of 28 days.

**Testing by an independent laboratory. Clinical evaluation of 20 people using the exfoliant mask, immediately after use, and after 28 days of treatment (3 times a week).

pH 3.5 - 4.5

YOUTH
SERUM

SACRED NATURE YOUTH SERUM

PRODUCT

Lightweight serum with bio-fermented antioxidant ingredients (Scientific Garden Extract™), tamarind – a vegetal alternative to hyaluronic acid - and kangaroo paw flower extract, an Australian flower with a firming action. It defends the skin from free radicals, for a visibly healthier and younger look.

ORGANIC CERTIFIED COSMETIC

99.6% natural origin of total
27.5% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

The light and biomimetic texture, based on lecithin and shea butter, has a very pleasant fluidity and immediately makes the skin softer and more velvety, without producing a clogging sensation. Formulated to be applied as a first step in combination with the cream, it easily absorbs and helps to maximize the anti-aging action.

ADVANTAGES

Biomimetic texture
Light and velvety skin feel
Youth concentrate – moisturizes, protects and firms
100% natural fragrance

ACTIVE INGREDIENTS

SCIENTIFIC GARDEN EXTRACT™ A complex of bio-fermented organic extracts of myrtle, elderberry and pomegranate, directly selected and grown by [comfort zone] to ensure traceability, sustainability and maximum effectiveness. The selected berries, leaves and peels have a high content of antioxidant and protective phytoactive ingredients, which preserve the skin's beauty and youth from the daily attack of free radicals.

KANGAROO PAW FLOWER EXTRACT From the flower of an endemic Australian plant, this firming extract promotes the synthesis of the TNX protein that regulates the association of collagen fibrils and elastin fibres.

TAMARIND EXTRACT A plant-based alternative to hyaluronic acid. The fruit's seeds are used to produce polysaccharides that bind water and retain it for optimal skin hydration.

RECOMMENDATIONS

For all skin types.

HOW TO USE

Apply morning and evening to clean, dry face and neck. Massage to ensure absorption. Subsequently apply Hydra Cream or Nutrient Cream, depending on your skin condition.

EFFICACY TEST

100% of the panel believes that the product has a good fluidity.
100% of the panel believes that the product makes the skin visibly healthier, more radiant and toned.*

*Self-evaluation, 20 people using the youth serum for 28 days.

Test conducted by independent laboratories.

SACRED NATURE HYDRA CREAM

PRODUCT

Light cream with bio-fermented antioxidant ingredients (Scientific Garden Extract™) and Japanese Cedar Bud Extract. It fortifies and reinforces the skin barrier for visibly healthier and hydrated look.

ORGANIC CERTIFIED COSMETIC

99.7% natural origin of total
30.7% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

The formulation is designed to provide light hydration without weighing down and clogging the skin. The choice of a lecithin-based biomimetic emulsifier allows the cream to be easily absorbed. Organic shea butter and almond oil create the right balance of moisturizing performance and sensory appeal for soft and silky skin from the first application.

ADVANTAGES

Biomimetic texture
Increases skin resilience
Ideal for normal and dehydrated and dry skin
100% natural fragrance
Non-comedogenic

ACTIVE INGREDIENTS

SCIENTIFIC GARDEN EXTRACT™ A complex of bio-fermented organic extracts of myrtle, elderberry and pomegranate, directly selected and grown by [comfort zone] to ensure traceability, sustainability and maximum effectiveness. The selected berries, leaves and peels have a high content of antioxidant and protective phytoactive ingredients, which preserve the skin's beauty and youth from the daily attack of free radicals.

JAPANESE CEDAR BUD EXTRACT Obtained from young buds that are rich in vitamins, minerals, proteins, sugars and lipids. It stimulates the cellular renewal of the epidermis, increasing its barrier effect and ability to defend against environmental aggressors and aging.

ORGANIC BURITI OIL A precious active ingredient derived from a palm tree native to Brazil, which is also known as the "Tree of life". Its characteristic bright orange color reflects its remarkably high carotenoid content, which is associated with its recognized antioxidant potential.

RECOMMENDATIONS

Ideal for normal to dry skin, it is also an excellent solution for mature skin in hot and humid climates.

HOW TO USE

Apply morning and evening to clean, dry face and neck. Massage to ensure absorption.

PRODUCT

Rich cream with bio-fermented antioxidant ingredients (Scientific Garden Extract™), biotechnological moss extract. It fortifies and reinforces the skin barrier, for visibly nourished and more radiant look.

COSMOS ORGANIC CERTIFIED

99.2% natural origin of total
26.5% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

The formulation is designed to provide deep nourishment, comfort and protection to skin prone to dryness and more exposed to environmental stresses such as wind and harsh climates. The rich consistency is the result of a balance between organic shea butter and jojoba oil, which together provide the ideal basis for conveying the active ingredients and enveloping the skin in a protective and sensorially pleasing texture.

ADVANTAGES

Increases skin resilience
Rich and protective texture
Deep nourishment and immediate comfort
100% natural fragrance

ACTIVE INGREDIENTS

SCIENTIFIC GARDEN EXTRACT™ A complex of bio-fermented organic extracts of myrtle, elderberry and pomegranate, directly selected and grown by [comfort zone] to ensure traceability, sustainability and maximum effectiveness. The selected berries, leaves and peels have a high content of antioxidant and protective phytoactive ingredients, which preserve the skin's beauty and youth from the daily attack of free radicals.

BIOTECHNOLOGICAL MOSS EXTRACT Biotechnology has provided an opportunity to obtain a sustainable extract from a precious resource: mosses, the first plants to conquer the earth, known for their extraordinary resilience. Moss extract is based on the innovative anti-aging concept that cell health is linked to cellular exchange between the nucleus and extracellular matrix. By protecting this exchange, the skin can adapt to environmental changes, becoming more resilient and less prone to premature aging.

ORGANIC BURITI OIL A precious active ingredient derived from a palm tree native to Brazil, which is also known as the "Tree of life". Its characteristic bright orange color reflects its remarkably high carotenoid content, which is associated with its recognized antioxidant power.

RECOMMENDATIONS

Ideal for skin that is dry, mature or exposed to particular environmental stresses (wind, cold climates, etc.).

SACRED NATURE HAND & BODY SOAP

PRODUCT

Gentle body and hand soap with organic shea butter that boasts emollient and antioxidant properties. Its solid form is a response to the growing interest in water-free products with eco-friendly textures and formats, featuring reduced packaging and a limited number of ingredients.

ORGANIC CERTIFIED COSMETIC

99.9% natural origin of total
80.7% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

Formulated with certified organic ingredients, it leaves the skin soft and velvety, thoroughly cleansing without dehydrating it. Suitable for daily use, it can also be used in the shower as an alternative to traditional shower gel.

ADVANTAGES

Lightweight packaging
Travel-friendly
Gentle on the skin
Versatile use (the four pieces that make up the soap can be used separately)
100% natural fragrance

ACTIVE INGREDIENTS

ORGANIC SHEA BUTTER From an African plant known as the "Tree of youth". Thanks to its highly emollient and moisturizing action, it is considered very beneficial for the skin's youth. The high vitamin E content also offers safe protection against free radicals.

RECOMMENDATIONS

For all skin types.

HOW TO USE

It can be used for cleansing the hands or on the whole body when bathing or showering. Gently rub the soap on wet skin and rinse.

SACRED NATURE BODY BUTTER

PRODUCT

Rich body cream, with bio-fermented antioxidant ingredients (Scientific Garden Extract™), it nourishes and leaves the skin smooth.

ORGANIC CERTIFIED COSMETIC

99.4% natural origin of total
30.5% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

Its soft and tactile texture introduces the sensory experience of shea butter, which is dense and compact when first touched and then melts between the fingers, leaving a very pleasant protective film on the skin. Massaging triggers the texture's transformation from compact and creamy to smoother, silkier and more enveloping.

ADVANTAGES

Soft and tactile texture
Nourished and compact skin
Deep nourishment and silky feel
100% natural fragrance

ACTIVE INGREDIENTS

SCIENTIFIC GARDEN EXTRACT™ A complex of bio-fermented extracts of myrtle, elderberry and pomegranate, entirely selected and developed by [comfort zone] to ensure traceability, sustainability and cosmetic effectiveness. The selected berries, leaves and peels have a high content of antioxidant and protective phytoactive ingredients, which preserve the skin's beauty and brightness from the constant and daily attack of free radicals.

ORGANIC BURITI OIL A precious active ingredient derived from a palm tree native to Brazil, which is also known as the "Tree of life". Its characteristic bright orange color reflects its remarkably high carotenoid content, which is associated with its recognized antioxidant potential.

ORGANIC SHEA BUTTER From an African plant known as the "Tree of youth". Thanks to its highly emollient and moisturizing action, it is considered very beneficial for the skin's youth. The high vitamin E content also offers safe protection against free radicals.

RECOMMENDATIONS

For all skin types, especially the driest and most undernourished skin.

HOW TO USE

Apply all over the body and massage with circular movements to ensure absorption. The tactile texture ensures extended massage time.

EFFICACY TEST

Skin hydration increases by 30%*

100% of the panel believes that the product makes the skin softer, silkier and more velvety**

SOAP

SACRED NATURE CLEANSING BALM

PRODUCT

Concentrated cleansing balm for the face and eyes with a texture that transforms from balm to milk when used. With organic buriti oil it removes makeup and impurities, leaving the skin soft and smooth.

ORGANIC CERTIFIED COSMETIC

100% natural origin of total
26.1% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

Formulated to offer very gentle cleansing for the face and eyes with just one step. The dense texture composed of organic buriti and almond oil, which contains a high level of antioxidants that give the product its orange color, enables it to be massaged with techniques that reactivate microcirculation, oxygenate the skin and, by capturing impurities, purify it. In contact with water, the balm texture transforms into a milky solution.

ADVANTAGES

Double cleansing: face and eyes
Just a little product is enough to completely cleanse the face and the eyes
Skin feel with moisturizing effect
Transforming texture from balm to milk
Fragrance-free
Ophthalmologically tested

ACTIVE INGREDIENTS

ORGANIC BURITI OIL A precious active ingredient derived from a palm tree native to Brazil, which is also known as the "Tree of life". Its characteristic bright orange color reflects its remarkably high antioxidant carotenoid content.

RECOMMENDATIONS

For skin of all ages, especially normal or dehydrated skin.

HOW TO USE

Using a spatula take a small amount of cleansing balm and massage on the face and neck. Remove using a cleansing towel.

SACRED NATURE HYDRA MASK BASE

PRODUCT

Innovative formulation with natural gelling agents obtained from orange peel. It is a professional base which, mixed with powders and particles, creates varied products with specific cosmetic actions.

ORGANIC CERTIFIED COSMETIC

99.3% natural origin of total
15.9% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

Formulated with natural gelling agents obtained from orange peel, its consistency makes it ideal for mixing with scrub particles to promote an exfoliating action or to transform it into a purifying mask when combined with clay powders. The product can also be used alone to provide a moisturizing action.

ADVANTAGES

Versatile and multifunctional base
Structure based on natural pectins

ACTIVE INGREDIENTS

PECTIN A structural substance found in the cell wall of fruits and vegetables. It was chosen as a natural agent alternative to traditional emulsifiers. In contact with water it produces a hydrocolloid that forms an elastic film on the skin, which reduces water loss from the inner layers of the epidermis and maintains the correct surface moisture. It gives skin a fresh and velvety feel.

RECOMMENDATIONS

For all skin types.

HOW TO USE

TO CREATE THE SCRUB: Take 3 scoops of HYDRA MASK BASE (6 g) with the spoon and add it to 1 scoop of POWDER SCRUB (0.6 g). Mix and massage on the face, neck and décolleté with circular movements, then remove with a damp and lukewarm towel.

TO CREATE THE CLAY MASK: Take 7 scoops of HYDRA MASK BASE (14 g) with the spoon and add 2 scoops of GLOW CLAY MASK (2 g). Mix and apply in a thick layer on the face. Leave on for 10 minutes. Remove with a damp, lukewarm towel.

PRODUCT

Concentrated soothing solution of distilled flower waters of cornflower, Roman chamomile and lavender, which completes the cleansing process and helps to optimize skin comfort for the face and eye area.

ORGANIC CERTIFIED COSMETIC

99.9% natural origin of total
19% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com1>

FEATURES

The solution has been formulated for use after cleansing to balance the skin and prepare it for subsequent treatments. This product, which is alcohol-free and contains softening substances, can also be used to soothe tired and strained eyes.

ADVANTAGES

Floral water concentrate
Soothing
Alcohol-free
Double use for both face and eye contour
Ophthalmologically tested

ACTIVE INGREDIENTS

CORNFLOWER FLOWER WATER a decongestant, it soothes skin and swollen or tired eyes.
ROMAN CHAMOMILE FLOWER WATER soothing, with an anti-redness effect.
LAVENDER FLORAL WATER purifying and calming.

RECOMMENDATIONS

For all skin types, including the most tired and stressed skin. It can also be used around the eye contour area to restore lightness and well-being.

HOW TO USE

Apply to face, neck and décolleté with cotton pads.
It is possible to soak the cotton pads and apply them to the eyes while the mask is processing.

SACRED NATURE RUBBER MASK

PRODUCT

Massage mask with an elastic texture and lifting action for the face, enriched with a mix of polyglycerides with a moisturizing action.

ORGANIC CERTIFIED COSMETIC

99.8% natural origin of total
11.4% of the total ingredients are from organic farming
COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at <http://COSMOS.ecocert.com>

FEATURES

The special viscoelastic texture allows gradual and progressive removal, creating an intense massage that promotes effective tissue reoxygenation and a visible regenerating and lifting effect on the face, neck and décolleté.

ADVANTAGES

Natural viscoelastic texture
Can be adjusted according to skin condition
The Regener-lift Massage that accompanies this mask provides intense plumping and lifting effects, comparable to those achieved with devices.

ACTIVE INGREDIENTS

POLYGLYCERIDE MIX An Ecocert-certified plant-based alternative to traditional lanolin, a wax extracted from the animal world and used for its protective, emollient and moisturizing effect. The polyglyceride mix is obtained from the transformation of vegetable oils and has the extraordinary characteristic of absorbing at least 200% of its weight in water, promoting a moisturizing action.

RECOMMENDATIONS

For skins that lack tone and firmness and require lifting and plumping. The product is used intensely for lifting and plumping and is therefore not suitable for sensitive skin and skin with fragile capillaries.

HOW TO USE

Remove the product from the packaging (about 3 full scoops), apply to the face, neck and décolleté and massage for a few of minutes until the product starts to dry and its adhesiveness increases, allowing manual removal.

Follow the steps on the technical treatment sheets and Dossier.

CAUTIONS: Avoid contact with the eyes

MASK

SACRED NATURE REGENERATIVE ELIXIR

RECOMMENDATIONS	<p>Ideal for all ages, it is recommended:</p> <ul style="list-style-type: none"> - for mature, undernourished skin that shows clear signs of aging in the version with RUBBER MASK. - for all skin types that require deep cleansing and stimulation, in the version with GLOW CLAY MASK.
BENEFITS	Regenerating - Antioxidant - Firming
DURATION	50 minutes
PROFESSIONAL PRODUCTS	<p>CLEANSING BALM HYDRA MASK BASE POWDER SCRUB DISTILLED FLOWER TONER RUBBER MASK OR GLOW CLAY MASK NUTRIENT CREAM</p>
ACCESSORIES	CLEANSING TOWEL - SPATULA & SPOON - BOWL
<p>TREATMENT STEPS (for massage techniques, see the specific section in the dossier)</p>	
PRELUDE	1. Introductory decontracting massage and application of warm dry towels under the neck, on the sternum, and over the eyes.
DEEP CLEANSING MASSAGE	<p>2. Apply 2 scoops of CLEANSING BALM on the skin and gently massage with the special technique to promote the removal of makeup and impurities. Remove with the warm damp CLEANSING TOWEL.</p> <p>3. Take 3 scoops of HYDRA MASK BASE + 1 scoop of POWDER SCRUB and massage with circular movements. This should be calibrated according to the specific skin condition (for more delicate skin, we recommend half a scoop of POWDER SCRUB).</p> <p>4. Remove excess particles with the warm, damp CLEANSING TOWEL and then use a dry towel to remove any residues.</p> <p>5. Spray DISTILLED FLOWER TONER over the entire treated area and allow it to dry naturally. Add a couple of sprays to the eye area and dab with the palms of your hands together to release a beneficial warmth for the duration of two deep breaths.</p>
<p>OPTION 1 MASK RUBBER MASK</p> <p>Do not use on sensitive skin and on skin with capillary fragility.</p>	<p>6.1 For a firming effect, take 2 doses of RUBBER MASK with the small spoon. Apply and massage on the face, neck and décolleté until the product becomes less moist and more adhesive. Use the REGENER-LIFT massage technique. This technique restores tired facial muscles with intensive micro-movements, which should be repeated several times for a total of 10 minutes. Thoroughly rinse the RUBBER MASK using the warm damp CLEANSING TOWEL.</p>
<p>OPTION 2 MASK GLOW CLAY MASK</p>	<p>6.2 For deep cleansing, take 7 scoops of HYDRA MASK BASE + 2 scoops of GLOW CLAY MASK. Apply to face, neck and décolleté.</p> <p>6.3 Massage with circular movements for the first 3 minutes, then leave on for the remaining 7 minutes. During application, cotton discs can be soaked with DISTILLED FLOWER TONER and placed on the eyes for a soothing and revitalizing compress.</p> <p>6.4 Remove with the warm damp CLEANSING TOWEL.</p>
<p>NOURISHING TOUCH CLOSING</p>	<p>7. Spray DISTILLED FLOWER TONER over the entire treated area and allow it to dry naturally.</p> <p>8. Apply the NUTRIENT CREAM and follow the specific closing procedures.</p> <p>9. Offer an organic juice together with the prescription card accompanied by selected products to prolong the benefits of the treatment at home.</p>

08. TREATMENTS

SACRED NATURE REGENERATIVE HYDRA

AIM OF THE TREATMENT

Revitalizing hydrating antioxidant express face treatment for immediate radiance. With formulations certified according to COSMOS guidelines, it ensures pleasant and visible freshness and vitality. Its effectiveness is guaranteed by the combination of renewal, deep hydration and the 7-step Regeneration ritual.

RECOMMENDATIONS	Ideal for tired and dull skin.
BENEFITS	Antioxidant - Immediate brightness, freshness and vitality - Hydration boost
DURATION	30 minutes
PROFESSIONAL PRODUCTS	CLEANSING BALM HYDRA MASK BASE POWDER SCRUB DISTILLED FLOWER TONER NUTRIENT CREAM
ACCESSORIES	CLEANSING TOWEL - SPATULA & SPOON - BOWL
TREATMENT STEPS (for massage techniques, see the specific section in the dossier)	
PRELUDE	1. Introductory decontracting massage and application of warm dry towels under the neck, on the sternum, and over the eyes.
DEEP CLEANSING MASSAGE	2. Apply 2 scoops of CLEANSING BALM on the skin and gently massage with the special technique to promote the removal of makeup and impurities. Remove with the warm damp CLEANSING TOWEL .
	3. Apply a generous layer of HYDRA MASK BASE on the face (1 scoop), neck and décolleté and leave on for 5 minutes.
	4. Mix together 2 scoops of HYDRA MASK BASE and 1 scoop of POWDER SCRUB and massage with circular movements. This should be calibrated according to the skin condition (for more delicate skin, we recommend half a scoop of POWDER SCRUB).
7-STEP REGENERATION	5. Remove with a warm damp CLEANSING TOWEL . Spray the DISTILLED FLOWER TONER on the face and neck, then apply light pressure to the cheeks, forehead, chin, nose and neck. Finally give a few light taps with the tips of your fingers until the toner has been completely absorbed. Repeat this procedure for a total of 7 times. Then dab with the palms of your hands together to release a beneficial warmth for the duration of two deep breaths.
NOURISHING TOUCH	6. Apply the NUTRIENT CREAM and follow the specific closing procedures.
CLOSING	7. Offer an organic juice together with the prescription card accompanied by selected products to prolong the benefits of the treatment at home.

10. AT A GLANCE – PROFESSIONAL

PRODUCTS	DESCRIPTION	INGREDIENTS & ACTION	RESULTS	SUGGESTIONS
 <p>SACRED NATURE CLEANSING BALM 220 ml</p> <p>100% natural ingredients 26.1% ingredients from organic farming</p> <p>COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at http://COSMOS.ecocert.com1</p>	<p>concentrated cleansing balm for the face and eyes with a texture that transforms from balm to milk when mixed with water.</p>	<p>ORGANIC BURITI OIL antioxidant emollient</p> <p>ORGANIC ALMOND OIL emollient</p>	<p>gentle cleansing</p> <p>removal of makeup and impurities</p> <p>skin reoxygenation thanks to the high antioxidant content</p>	<p>double cleansing: face and eyes</p> <p>transforming texture from balm to milk, which enables a prolonged massage, ideal at the start of the treatment</p> <p>for skin of all ages, especially normal or dehydrated skin</p>
 <p>SACRED NATURE HYDRA MASK BASE pH 4 - 4.5 220 ml</p> <p>99.3% natural ingredients 15.9% ingredients from organic farming</p> <p>COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at http://COSMOS.ecocert.com1</p>	<p>a versatile professional base which, mixed with powders and particles, creates varied products with specific cosmetic actions</p> <p>innovative formulation with natural gelling agents obtained from orange peel</p>	<p>PECTIN a natural emulsifier, it keeps the skin moist and hydrated</p>	<p>Exfoliating: ideal consistency to be mixed with scrub particles to effectively and gently renew the skin</p> <p>Purifying: when combined with clay powders for balanced purification</p> <p>Moisturizing: featuring no additional components, it is an excellent moisturizing mask</p>	<p>Highly versatile: beneficial for all skin types!</p>
 <p>SACRED NATURE DISTILLED FLOWER TONER pH 6 – 6.5 100 ml</p> <p>99.9% natural ingredients 19% ingredients from organic farming</p> <p>COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at http://COSMOS.ecocert.com1</p>	<p>concentrated soothing solution of three distilled floral waters</p> <p>completes the cleansing process and helps to optimize skin comfort for the face and eye area</p>	<p>CORNFLOWER FLOWER WATER 10% decongestant</p> <p>ROMAN CHAMOMILE FLOWER WATER 10% soothing anti-redness</p> <p>LAVENDER FLORAL WATER 20% calming purifying</p>	<p>helps to balance the skin after cleansing and to prepare it for subsequent treatments</p> <p>deep hydration promotes radiance and vitality</p>	<p>can also be used to soothe tired and strained eyes because it is alcohol-free and contains softening substances</p> <p>for all skin types, including the most tired and stressed skin</p> <p>extra touch: soak the cotton pads and apply them to the eyes while the mask is in place</p>

PRODUCTS	DESCRIPTION	INGREDIENTS & ACTION	RESULTS	SUGGESTIONS
 <p>SACRED NATURE RUBBER MASK pH 5 – 5.5 100 ml</p> <p>99.8% natural ingredients</p> <p>11.4% ingredients from organic farming</p> <p>COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at http://COSMOS.ecocert.com1</p>	<p>massage mask with an elastic texture and moisturizing and lifting action for the face</p>	<p>POLYGLYCERIDE MIX moisturizing protective emollient</p>	<p>viscoelastic texture which allows gradual and progressive removal, creating an intense massage called Regener-lift</p> <p>promotes tissue reoxygenation and a visible regenerating and lifting effect on the face, neck and décolleté</p>	<p>ideal for skin lacking tone and therefore requires a lifting action</p> <p>not suitable for sensitive skin and capillary fragility: the product is applied with an intense skin lifting massage</p> <p>CAUTIONS Avoid contact with the eyes</p>
 <p>SACRED NATURE POWDER SCRUB 60 ml</p> <p>100% natural ingredients</p> <p>100% of the total ingredients are from organic farming</p> <p>COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at http://COSMOS.ecocert.com1</p>	<p>pomegranate seed powder with an exfoliating action to purify and smooth the skin</p>	<p>POMEGRANATE SEED POWDER antioxidant smoothing</p>	<p>the particles distributed in the creamy base remove dead skin cells and immediately make the skin radiant and soft</p>	<p>massage with circular movements of varying intensity depending on the skin condition and desired effect</p>
 <p>SACRED NATURE GLOW CLAY MASK 60 ml</p> <p>100% natural ingredients</p> <p>COSMOS NATURAL certified by Ecocert Greenlife according to COSMOS standard available at http://COSMOS.ecocert.com1</p>	<p>100% natural clay powder with an absorbent and brightening action.</p>	<p>BRAZILIAN CLAY POWDER 100% NATURAL remineralizing revitalizing</p>	<p>brighter and more vital skin thanks to its high mineral content</p>	<p>ideal for young, impure or heavily polluted skin</p>
 <p>SACRED NATURE NUTRIENT CREAM pH 5 – 5.5 220 ml</p> <p>99.2% natural ingredients</p> <p>26.5% ingredients from organic farming</p> <p>COSMOS ORGANIC certified by Ecocert Greenlife according to COSMOS standard available at http://COSMOS.ecocert.com1</p>	<p>antioxidant nutrient cream</p>	<p>SCIENTIFIC GARDEN EXTRACT™ complex of bio-fermented organic extracts of myrtle, elderberry and pomegranate. antioxidant protective</p> <p>BIOTECHNOLOGICAL MOSS EXTRACT promotes cellular exchange between the nucleus and extracellular matrix and makes the skin more resilient to changes</p> <p>ORGANIC BURITI OIL antioxidant, emollient</p>	<p>promotes skin resilience</p> <p>combats free radicals</p> <p>strengthens the skin barrier and prevents premature aging</p> <p>rich and protective texture thanks to organic shea butter and jojoba oil</p>	<p>perfect for dry, mature skin exposed to harsh climates</p>

11. GLOSSARY

ANTI-INFLAMMATORY	An ingredient that blocks or reduces inflammation, a body response that helps prevent an infection from spreading.
ANTIOXIDANT	An ingredient that protects against the harmful effects of free radicals (oxidation).
BIO-FERMENTATION EXTRACTION METHOD	A “two-stage” extraction method involving enzyme-assisted extraction and subsequent fermentation. This allows us to obtain an exclusive functional pool that has a higher concentration of antioxidant molecules than simple enzyme-assisted extractions. The previously extracted sugars are processed by the microorganism (yeast) which, as though it were a bio-reactor, produces additional substances that would not otherwise be obtained.
BIO-REGENERATIVE LINE	A skincare line that is effective and safe for regenerating the vitality of not only our skin, but also of our planet. By exploiting new sustainable techniques and safeguarding natural biodiversity, Sacred Nature can offer resilience to our skin and the world around it.
BIODIVERSITY	The coexistence of different animal, plant and microbial species in the same ecosystem creates a balance through their mutual relationships.
BIOMIMETIC	This is similar to the structure of the body and to what happens inside it.
BIOTECHNOLOGICAL MOSS EXTRACT	Biotechnology has provided an opportunity to obtain a sustainable extract from a precious resource: mosses, the first plants to conquer the earth, known for their extraordinary resilience. Moss extract (<i>Physcomitrella Patens</i>) is based on the innovative anti-aging concept that cell health is linked to cellular exchange between the nucleus and extracellular matrix. By protecting this exchange, the skin can adapt to environmental changes, becoming more resilient and less prone to premature aging.
CO ₂ SEQUESTRATION	Thanks to regenerative agriculture, it is possible to capture and “sequester” (or store) carbon dioxide produced by industries underground, with the aim of reducing greenhouse gas emissions into the atmosphere.
CORNFLOWER FLOWER WATER	A herbaceous plant with excellent decongestant properties. Provides relief to the skin and especially to eyes that are swollen, tired or that suffer from allergies.
COSMOS ORGANIC & COSMOS NATURAL CERTIFICATION	A certification established to bring together five important European organizations under the same umbrella and to promote more uniform regulation of the organic sector: Ecocert and Cosmebio for France, BDIH for Germany, the Soil Association for the UK and ICEA for Italy. Cosmos’ stated aim is to promote truly sustainable cosmetics throughout the whole supply chain, from raw materials to production and packaging. There are two different certification levels: “Cosmos Organic” for organic cosmetics, i.e. all Sacred Nature products with the exception of Sacred Nature Glow Clay Mask, which has the “Cosmos Natural” natural cosmetic certification.
ELDERBERRY (<i>SAMBUCUS NIGRA</i>)	A deciduous shrub that is widespread in many of the world’s continents, including Europe. Its fruits consist of clusters of tiny, dark-colored berries. It is used in the medical field and food industry and also has very interesting effects on the skin. It contains two main classes of polyphenols: flavonoid glycosides, which have a valuable antioxidant effect, and hydroxycinnamic acid derivatives with anti-inflammatory and antibacterial properties.
EWG VERIFIED™ (ENVIRONMENTAL WORKING GROUP)	The Environmental Working Group is an American non-profit organization, which, since 1993, has awarded the EWG verified™ mark to cosmetics that meet strict transparency and safety criteria. It consists of a team of scientists, toxicologists, chemists and epidemiologists dedicated to collecting information on ingredients used in cosmetics, developing a product evaluation process that guarantees consumers the highest level of safety. The active ingredients undergo a two-stage evaluation. To complete the certification process the company must demonstrate that it complies with the strict criteria set out by EWG. The EWG VERIFIED™ mark remains valid for up to three years. After this period, updated product information must be submitted and the verification process must be completed again.

FLAVONOIDS	Natural plant-based compounds with an antioxidant action.
FREE RADICALS	Very reactive and oxidizing molecules produced by oxygen metabolism and therefore by breathing. Free radicals have one or more unpaired – in other words free – electrons and this characteristic makes them highly reactive, since they are unstable and damage biological structures such as the skin.
GLUCONOLACTONE	A polyhydroxy acid with a gentle exfoliating action. It acts on the surface layer of the skin, stimulating the structure of the corneocytes and promoting progressive cell turnover. It is a recommended acid for both normal and more delicate skins.
HYDROXYCINNAMIC ACID	Phenolic compounds that are part of the polyphenol group. They are present in practically all parts of fruit and vegetables. (See polyphenols).
JAPANESE CEDAR BUD EXTRACT	Obtained from this plant’s young buds, which are rich in vitamins, minerals, proteins, sugars and lipids. Preserves the energy of keratinocytes and all processes essential for effective epidermal reconstruction: proliferation, differentiation, keratinization and desquamation. This cellular efficiency preserves the biosynthesis of key ceramides and the cohesion of the corneocytes with consequent protection of the skin’s efficient structural barrier function, making the skin more compact, toned, elastic and resistant to environmental aggressors and aging.
KANGAROO FLOWER EXTRACT (KANGAROO PAW)	The flower of an endemic Australian plant, it contains rutin and fructose. It promotes a firming action by targeting sagging skin. It increases the synthesis of the Tenascin-X protein, which regulates the association of collagen fibrils and elastin fibers for a deep anti-aging action.
LAVENDER FLOWER WATER	Plant used in cosmetics due to its double action: purifying and healing for impure skin; calming for more sensitive and irritated skin.
MYRTLE (<i>MYRTUS COMMUNIS</i>)	Biotechnology has provided an opportunity to obtain a sustainable extract from a precious resource: mosses, the first plants to conquer the earth, known for their extraordinary resilience. Moss extract (<i>Physcomitrella Patens</i>) is based on the innovative anti-aging concept that cell health is linked to cellular exchange between the nucleus and extracellular matrix. By protecting this exchange, the skin can adapt to environmental changes, becoming more resilient and less prone to premature aging.
ORGANIC BURITI OIL	An evergreen Mediterranean shrub. Known since the time of the ancient Romans, its anti-inflammatory and anti-aging properties are exploited by the cosmetics industry. Myrtle leaves have a very varied polyphenolic composition: myricetin derivatives (excellent antioxidants and natural anti-aging agents), gallotannins (which protect collagen) and tannins (vasoconstrictors that protect sensitive skin and its capillaries).
ORGANIC SHEA BUTTER	A precious active ingredient derived from a palm tree native to Brazil, which is also known as the “Tree of life”. Its characteristic bright orange color reflects its remarkably high carotenoid content, which is associated with its recognized antioxidant power. Gives the product a dense and nourishing texture.
OXIDATION	From an African plant known as the “Tree of youth”. Thanks to its highly emollient and moisturizing action, it is considered very beneficial for the skin’s youth. The high vitamin E content also offers safe protection against free radicals.
PECTIN	Chemical reaction that occurs when a substance or element combines with oxygen. It is one of the most common reactions and in some cases produces a large amount of energy. The most important oxidation process is cellular respiration, through which living organisms obtain the energy necessary for life.
POLYGLYCERIDES	A structural substance found in the cell wall of fruits and vegetables. It was chosen as a natural alternative agent to traditional emulsifiers. In contact with water it produces a hydrocolloid that forms an elastic film on the skin, which reduces water loss from the inner layers of the epidermis and maintains the correct surface moisture. It gives skin a fresh, velvety feel.
	An Ecocert-certified plant-based alternative to traditional lanolin, a wax extracted from the animal world and used for its protective, emollient and moisturizing effect. The polyglyceride mix is obtained from the transformation of vegetable oils and has the extraordinary characteristic of absorbing at least 200% of its weight in water, promoting a moisturizing action.

Handwriting practice lines consisting of 20 horizontal dashed lines.
