CONSCIOUS

SUN PROTECTION

SAFETY AND SUSTAINABILITY

Using adequate sunscreen is essential to protect your skin from UVA and UVB damage, such as sunburn and erythema, and to prevent blemishes and aging.

However, recent studies* have shown that some sunscreens are dangerous for the aquatic ecosystem, compromising its rich biodiversity: it is therefore crucial when choosing SPFs to make sure they are safe for both the skin and the environment.

SUN SOUL

SKIN AND OCEAN CONSCIOUS

Constant formulative and scientific research carried out by [comfort zone] has resulted in the new Sun Soul line of sunscreen products designed to be safer for the skin and more environmentally sustainable.

UVA/UVB protection with anti-aging action and an innovative DNA-DEFENSE PEPTIDE encapsulated in highly biodegradable, ocean-safe formulas.

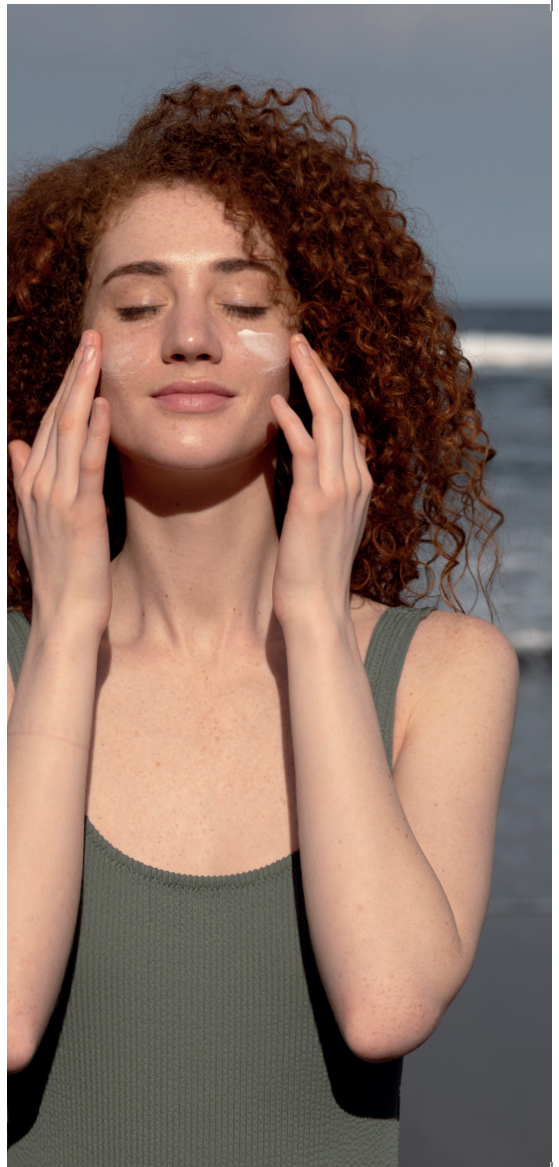

SAFETY AND EFFECTIVENESS ON THE SKIN

Pleasant to use and fast-absorbing formulas enriched with specific active ingredients that effectively protect against photoaging.

UVA/UVB PHOTOSTABLE FILTERS that maintain their effectiveness for the full duration of sun exposure.

DNA-DEFENSE PEPTIDE that mimics the action of a protein which repairs damage to skin DNA caused by the sun, strengthening natural defenses and counteracting the appearance of wrinkles and spots.

WATER RESISTANT to ensure optimal protection of the skin, both in and out of the water.

SAFETY AND SUSTAINABILITY FOR THE OCEANS

Sun Soul has been formulated by selecting raw materials with the best environmental profile, prioritizing naturalness, high biodegradability and aquatic non-toxicity.

UP TO 98% SAFE INGREDIENTS FOR THE AQUATIC ENVIRONMENT ⁽¹⁾

FILTERS SCIENTIFICALLY TESTED AS SAFE FOR THE MARINE ENVIRONMENT

without oxybenzone and octinoxate ⁽²⁾

UP TO 96.5% NATURAL-ORIGIN INGREDIENTS

(1) Not classified as hazardous to the aquatic environment.

(2) Experimental study on the mixture of filters used in Sun Soul products, tested on a representative sample of aquatic organisms.

SOLAR BEAUTY ROUTINE

SUN PREPARATION AND FACE PROTECTION

TAN MAXIMIZER

intensifying tanning cream

94.6% ingredients of natural origin

Prepares skin for sun exposure. Perfectly combines with sunscreens, intensifying and prolonging a tan.

200 ml e 6.76 fl.oz.

OUR PROMISE

CONSCIOUS SKIN SCIENCE™

Fully active formulas with concentrated natural ingredients and functional active ingredients and without raw materials that have a negative impact on the environment, such as silicones, mineral oil, animal derivatives, artificial colors and sulfates.

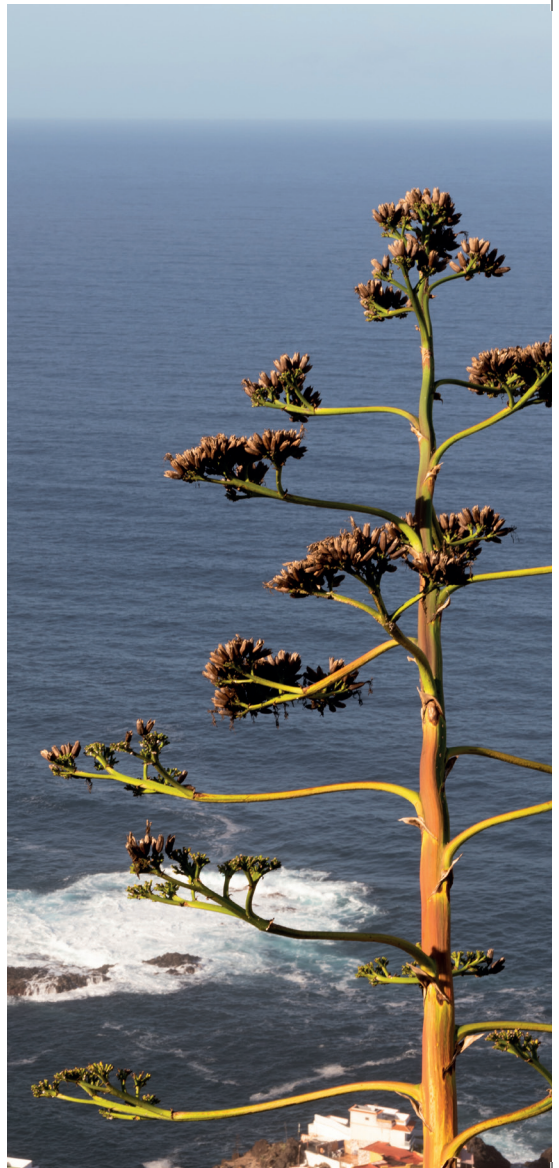

The same attention is paid to packaging designed to be easily recycled, using recycled or renewable raw materials. Comfort Zone is constantly working to reduce and neutralize its CO₂ emissions through reforestation projects.

Certified

Corporation

Production takes place at our Davines Village in Parma, Italy, a carbon neutral and B Corp™ certified facility using energy solely sourced from renewable sources.

TEN GOOD SUN RULES

- 1. EXPOSE YOURSELF TO THE SUN IN A GRADUAL** manner by increasing your exposure time day by day.
- 2. AVOID THE HOTTEST HOURS** of the day from 12.00 noon to 4.00 pm.
- 3. APPLY THE MOST SUITABLE PROTECTION** for your skin 30 minutes before exposure and repeat application every two hours and after bathing.
- 4. PROTECT** all body parts exposed to the sun with an adequate amount of product (35 grams for the entire body or about six teaspoons).
- 5. DO NOT USE PROTECTIONS FROM THE PREVIOUS YEAR** since the filters may have altered, reducing their protective capacity.
- 6. DO NOT USE PERFUME UNDER THE SUN**, which risks causing blemishes and reactions.
- 7. DO NOT STAY STILL IN THE SUN** since movement allows the sun's radiation to be distributed evenly over the body.
- 8. BE CAREFUL IF YOU ARE TAKING** anti-inflammatory, anti-diabetic, and oral contraceptive drugs, as well as certain medications for high blood pressure.
- 9. IF YOU ARE PREGNANT** avoid the sun.
Sun exposure can worsen dark spots and make them permanent.
- 10. PROTECT CHILDREN** up to six months, who should ideally be kept in the shade. When they get older, choose fragrance-free protection combined with the use of a hat or bandana and if possible protective glasses with a filter.
