From innovative studies on cellular senescence and skin structure degradation, a clinically-proven, clean and sustainable skincare with the new ARCHI-LIFT TECHNOLOGY™, empowered with Acetyl Hexapeptide-8 and Achillea millefolium from regenerative agriculture, visibly firming and reducing wrinkles for a plumper and rejuvenated skin.

The INTENSIVE SERUM, the line's hero product tested on more than 100 women, provides a youthful and healthy appearance. Its efficacy on the reduction of aging cells has been scientifically proven and instrumental tests show a -25% reduction in wrinkles.

CONSISTENT WITH OUR COMMITMENT TO SUSTAINABILITY AND CIRCULARITY, the new serum comes with a refill pack that allows the glass bottle to be reused and is easily recycled. Moreover, repeated purchase of the refill, which weighs 91% less than the original pack, reduces CO₂ emissions and therefore helps to limit environmental impact.

ALL THE FORMULAS ARE CLEAN, DERMATOLOGICALLY TESTED ON SENSITIVE SKIN, SUITABLE FOR VEGANS AND CONTAIN UP TO 99.5% INGREDIENTS OF NATURAL ORIGIN. Free of silicones, parabens, animal derivatives, artificial colorants, and synthetic fragrances, furthermore they do not contain acrylates and PEGs, for an even more sustainable approach. The completely NATURAL FRAGRANCE, in the creamy textures, ensures a very pleasant sensorial experience. Peels and eye formulas are FRAGRANCE-FREE.

The line guarantees even more lasting and visible results by following THE REJUVENATING ROUTINE, which includes a pre-treatment step with the new MICROPEEL LOTION, with 2.5% lactic acid and 2,5% gluconolactone for delicate and progressive daily micro-exfoliation, tested to bring radiance and visible smoothness, and the CREAM enriched with Peptides, Achillea millefolium, Paeonia albiflora and hyaluronic acid for extraordinary plumpness. When the skin requires a super-intensive and immediate boost, the new LIFT & FIRM AMPOULES with Epidermal Growth Factors (EGF) and peptides correct and re-plump wrinkles and instantly deliver a younger, firmer appearance.

As for professional facials, the new SUPER PEEL and ULTRA GLOW PEEL, with the layered application of different blends of alpha-hydroxy acids, can be customized according to the skin condition and is the perfect preparation for the PRO-LIFT FACIAL a combination of a very effective lifting peel-off mask and a Kobido massage, restoring fullness and visibly redefining the volume of the face.

As part of the company's efforts to increase sustainability, a Life Cycle Assessment (LCA) was conducted for the new Sublime Skin, which makes it possible to calculate the amount of CO₂ equivalent emitted throughout the product's life cycle, and then fully offset it thanks to the Davines Group's proprietary reforestation and social development project, Ethio Trees.

SUBLIME SKIN IS THEREFORE A COMPLETELY CARBON OFFSET LINE FROM THE SOURCE... TO YOU.

SUBLIME SKIN

THE NATURAL FILLER SOLUTION

DEGENER-AGING™ AND CELLULAR SENESENCE

Over the years, all skin layers undergo specific alterations that lead to degeneration of the three fundamental components that make up the skin structure – water, proteins and lipids – and the consequent appearance of wrinkles, loss of tone and less well-defined facial contours. This physiological process of structural skin aging called DEGENER-AGING™ is further aggravated along time by CELLULAR SENESENCE: senescent cells release harmful inflammatory molecules that attack neighboring cells, causing them to lose vitality and ability to replicate, and therefore triggering a further loss of tissue functionality.

SUBLIME SKIN: THE NATURAL FILLER SOLUTION

Innovative scientific and formulative studies have allowed our [comfort zone] research laboratories to counteract these effects through potent, concentrated formulas that act on both the visible and invisible signs and triggers of aging, to protect and restore the skin functionality, while visibly correcting wrinkles and loss of tone.

With the complete revamp of Sublime Skin, a new, daily and intensive home care along with more effective professional treatments combat SENESENCE and therefore the effects and root causes of DEGENER-AGING™ through increasingly advanced, cleaner and more sustainable solutions, clinically proven to reduce wrinkles and plump and firm skin, for a true NATURAL FILLER EFFECT.

In particular, the obvious link between senescent cells and the degeneration of skin structure has led to the strengthening of our proprietary ARCHI-LIFT™ TECHNOLOGY with ACETYL HEXAPEPTIDE-8, an innovative peptide that protects cells from senescence, and Achillea millefolium, a botanical extract that promotes collagen synthesis, studied in our Scientific garden and cultivated according to regenerative agriculture principles.

ACETYL HEXAPEPTIDE-8 REDUCING CELLULAR SENESENCE AND EXPRESSION LINES

Chosen for its DOUBLE ACTION ON CELLULAR SENESENCE AND EXPRESSION LINES, it is able to block the skin neurotransmitter responsible for muscle contraction and therefore reduce wrinkles and expression lines.

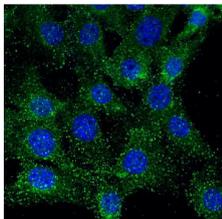

This high-tech ingredient effectively counteracts the degeneration caused by reducing inflammatory molecules (SASPs), benefiting the skin's vitality and efficiency.

Through immunofluorescence, in vitro testing on fibroblast cultures has shown visible and measurable reduction of the presence of inflammatory proteins and enzymes responsible for collagen and elastin breakdown.

ACHILLEA MILLEFOLIUM EXTRACT
A POTENT COLLAGEN PRODUCTION
BOOSTER FROM OUR OPEN-AIR LAB

Fully reflecting our conscious skin science philosophy, it is a completely traceable natural extract, studied by our research team at the Davines Village Scientific Garden in Parma, and then cultivated through regenerative agriculture and extracted with cold pressure, avoiding the use of chemical agents, to preserve its efficacy at the most potent level.

Chosen after an in-depth study of the scientific literature and directly observed in our open-air lab, it has proven to stimulate collagen by 35% and reduce the enzymes that destroy it.

+ 35% INCREASE IN COLLAGEN

The anti-aging and firming properties that we can boast for Achillea millefolium extract have been studied in vitro under 24 hr and 48 hr stress conditions. All cells, both those treated with Achillea millefolium and those left untreated, were irradiated by a solar simulator to recreate a stress condition. In the cells treated with Achillea millefolium, there is both an increase in collagen synthesis and a decrease in the activity of metalloproteinase, enzymes that destroy collagen, thereby protecting it over time.

HOME CARE

A complete range for face and eyes tested on panelists with different skin conditions and in different climates meets the needs for RENEWAL, CORRECTION and PLUMPNESS at all latitudes. The daily routine we recommend includes the new MICROPEEL LOTION, INTENSIVE SERUM and CREAM. When a specific intensive and immediate action is needed the AMPOULES, the PEEL PADS and the LIFT-MASK provide that extra boost for instant results. Moreover, the DUO EYE CREAM and EYE PATCH actively reduce wrinkles and under-eye bags for a firmer and brighter appearance.

CONSCIOUS, CLEANER FORMULAS

[comfort zone]'s commitment to maximum performance and sustainability drives our research and development. Our formulas feature high concentrations of natural-origin ingredients and we choose not to use silicones, animal derivatives, mineral oils and artificial colors. Guided by continuous improvement, the new Sublime Skin formulas are also free of ethoxylates (PEGs), acrylates and EDTA, gelling agents and emulsifiers not readily biodegradable in the environment.

CONSCIOUS PACKAGING

The new Sublime Skin line packaging expresses [comfort zone]'s ELEGANCE and SUSTAINABILITY in line with circular economy principles:
