THE GARDEN GIFTS 2021

Introducing the 2021 Garden Gifts by [comfort zone], celebrating our conscious result-driven and sustainable approach through a new, limited-edition collection.

Inspired by our Scientific Garden at the [comfort zone] Village in Parma, Italy, where all our formulas are created and manufactured, the new collection references the wonders that plants and flowers generate through our science-based research.

This years Gift Collection offers a wide range of our best-selling products for face and body, ensuring the perfect gift can be found for each skin condition. All formulas have been clinically and dermatologically tested, ensuring visible results, safety for the skin and respect for the planet.

Each box has been carefully curated, artistically illustrating the beauty of blossoming within nature and the scientific approach which allows our R&D experts to ensure skin's beauty and regeneration. The new, elegant structure, which opens as a drawer-like box, has been designed for optimal visibility in spas and to be reused at home.

Made in Italy with recycled FSC paper, the sets enclose recyclable, CO2 offset packaging.

CELEBRATE BEAUTY AND BIODIVERSITY WITH OUR NEW, CURATED SKINCARE KITS.
